

XML API SPECIFICATIONS

(Version:3.3.0)

After DLT you can use this code to send SMS from API using XML CODE

```
<?php
$xml_data ='<api>
<username>USERNAME</username>
<password>PASSWORD</password>
<senderid>SENDER ID</senderid>
<route>2</route>
<unicode></unicode>
<message>PUT your message content.</message>
<templateid>xxxxxxxxxxxxxxxxxxxx</templateid>
<sms>
<to>1 mobile number</to>
</sms>
<sms>
<to>2 mobile number </to>
</sms>

</api>';

$xml_url = "http://weberleads.in/xml-
api.php?xml=".urlencode($xml_data)."&format=XML";
```

```
$response = file_get_contents($api_url);
```

```
print_r($response);
```

```
?>
```
